SITUATION				
Current Situation:	<p>The Department of Water Resources advises that the primary spillway continues to flow at 100,000 cfs and lake levels have dropped to 894' feet. After evaluating the erosion on the emergency spillway, a plan was put in place to prevent further erosion. Utilizing trucks and helicopters, crews moved large rocks and gravel to fill erosion on the emergency spillway. DWR staff continues to inspect and evaluate the emergency and primary spillways for further erosion.</p> <p>Total discharges from the reservoir remain consistent with flood control releases at this time of year under these weather conditions. DWR does not expect the discharge from the reservoir to exceed the capacity of any channel downstream.</p> <p>For information on lake conditions; including lake levels, inflows, and outflows you can visit the following website. http://cdec.water.ca.gov/cdecapp/resapp/resDetailOrig.action?resid=ORO</p>			
Mandatory Evacuations:	<p>Oroville and Thermalito, the areas south of Lincoln Blvd on the west side of Lincoln to Ophir Road. All low-lying areas around the Feather River, which includes Gridley, Biggs, Yuba City, Loma Rica, and anywhere south of Butte County along the River.
